

This letter is an expression of interest from me for the UBS Graduate Trainee position that you have posted on your careers website. As an upcoming graduate (Bachelors in Technology) with a background in Computer Science Specl. AI & ML and extensive experience in Machine Learning, I am eager to contribute to and develop with a prestigious international financial institution such as UBS.

I have refined my abilities in software programming, machine learning, and data exploration throughout my time as a student at Vellore Institute of Technology, Bhopal. I've been able to hone my leadership, organizing, and marketing abilities through my participation in the Google Developer Student Clubs. I've been the leader of big college events before, securing big sponsorships and spearheading marketing campaigns that raised awareness and participation. These experiences have given me the tools I need to manage several activities, produce work under pressure, and collaborate well with others in a team.

Along with my accomplishments in academic and extracurricular endeavors, I have worked on a number of projects that highlight my technical expertise and enthusiasm for technology. Most notably, I used machine learning and computer vision techniques to create a gesture-based mouse control system. In order to improve my practical abilities and broaden my comprehension of machine learning techniques, I have also finished a number of ML assignments.

I am particularly drawn to UBS due to its commitment to innovation and excellence in the financial sector. I am eager to bring my analytical skills, technical expertise, and enthusiasm for continuous learning to your esteemed team. I am confident that my proactive approach and dedication will make me a valuable asset to UBS.

Thank you for considering my application. I look forward to the possibility of discussing how my background, skills, and ambitions align with the goals of UBS. I am available for an interview at your earliest convenience and can be reached at:
